

SDI Print to File

Graphic Export for GEO Applications

SDI Print to File is a graphic export utility for GEO applications on MS Windows XP and 2000 operating systems.

Publish for Free Viewers.

Print to File enables you to publish maps and logs in standard formats like CGM, EMF, JPEG, PDF, PNG and TIFF.

Your customers and partners can use popular desktop viewers to read your graphic deliverables.

Simple Install. Easy to Use.

SDI Print to File installs just like a Windows print driver. Users simply select "Print to File" to launch the SDI dialog, then choose your format and scaling options.

SDI Print to File saves you time and improves the usability of your distributed graphic files.
